# Why choose Solar?

## Avoid rising power bills.

Electricity prices are continually on the rise, this trend is set to continue into the future. The right time to install Solar is NOW. The sooner you can start taking advantage of the sun's free energy the sooner you can wave goodbye to those high electricity bills.

## Government Incentives

The Australian Government provides an incentive in the form of Renewable Energy Certificates which greatly reduces the upfront cost of the systems.

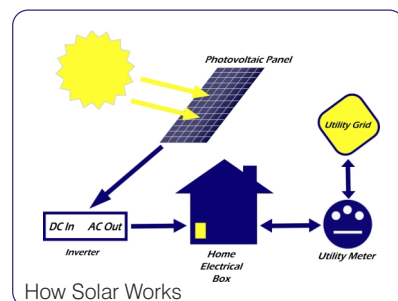

## Extended Warranty Period

All of the solar panels that we use have a 25 year performance warranty. Couple this with a 5 year (minimum) warranty on the inverter and you have great peace of mind.

At the end of installation the Ezy As Team will spend time to ensure you are confident with maintenance and how the system operates. Rest assured you will receive maximum benefit from your solar service.

Solar Inverter

How Solar Works

**Ezy As Electrical has done over 1000 solar installs throughout South East Qld and NSW. We have been installing our own systems since 2010 and unlike other solar companies are here for the long term.**

Our point of difference: We hold the accreditation and licences and are fully insured under Ezy As, from the initial quote to the install we look after the whole process.

Single storey to 20 storey, domestic, commercial, rural and everything in between, flat roof, tin roof, tile roof, tilt kits and unique roof solutions we install solar panels that will produce and come up with the right energy efficient solution for your house / home / business / farm / shed to help you be smarter with your energy bills.
